Zeus - ClockIt

Jul 2019 – Apr 2020

Team size - 4

- Zeus ClockIt combines elements of time entry, project, and resource management capabilities and features. The project has real-time health monitoring dashboards for employees and projects.

Project Stack

- *Angular 7, TypeScript, SCSS, PrimeNG, Highcharts, GIT, OAuth*

Roles and Responsibilities

- Have built the project from the ground up
- Responsible for the design and development of web pages based on wireframes or mock-ups
- Built reusable components, and directives
- Provided technical assistance to the development team on complex tasks
- Functional specifications were analyzed, comprehended, and estimated based on technical complexity

FSX Web Applications

Feb 2019 – Jul 2019

Team size - 3

- FSX web applications utilize the common UI design ensuring a consistent user experience across applications by creating custom/configurable UI components.

Project Stack

- *Angular 7, TypeScript, SCSS, NPM, GIT*

Roles and Responsibilities

- Produced components that can be configured and reused in other applications (such as dropdown, multi-list select, tree-view, image, popup, calendar, and other input components)
- Produced high-quality application deliverables in accordance with the project timeline
- Chaired meeting with the project owner to procure functional requirements

Re-Insurance Fund Allocations System

Dec 2018 – Feb 2019

Team size: 2

- The project involved developing a web-based application to automate the reinsurance fund allocations system and create reports based on the customer requirements for facultative, proportional, and excess-of-loss (XOL)

Project Stack

- *Angular 6, TypeScript, PrimeNG, Bootstrap, CSS3, NPM, SVN*

Roles and Responsibilities

- Responsible for the design and development of web pages based on wireframes or mock-ups
- Produced high-quality deliverables in accordance with the project timeline
- Developed dynamic forms with the use of angular reactive forms

Vendor Oversight Management

Jul 2016 – Nov 2018

Team size - 6

- The client is a prominent real estate, mortgage, and consumer debt marketplace and transaction solution provider. The project entailed creating a Vendor Management Platform that would allow customers to track all of their vendors in one location and receive timely notifications and insights regarding vendor compliance.

Project Stack

- *AngularJS, CSS3, NPM, GIT, Bootstrap, KendoUI, Jira*

Roles and Responsibilities

- Responsible for the design and development of web pages based on wireframes or mock-ups
- Worked in a highly collaborative agile team
- Worked closely with design, product management, and development teams to create elegant, re-usable, responsive, and interactive web pages
- Improved the application's performance

AWARDS & RECOGNITION
