PROJECTS

Crop Inventory Management
Apr 2020 — present

- **Project Stack:** Angular 10, TypeScript, SCSS, PrimeNG, Highcharts, GIT, KeyCloak
- The client is a prominent food and agri-business that supplies food components to thousands of clients worldwide, ranging from multi-national corporations with globally recognized brands to tiny family-owned companies.
- The client offers support services such as risk management solutions, logistics, infrastructure, and direct promotion of own brands to African customers via Packaged Foods Business.

Zeus - ClockIt
Jul 2019 — Apr 2020

- **Project Stack:** Angular 7, TypeScript, SCSS, PrimeNG, Highcharts, GIT, OAuth
- Zeus ClockIt combines elements of time entry, project, and resource management capabilities and features.
- The project makes it easier for people to create tasks and log entries.
- Employee and project dashboards for real-time health checks
- Approval of timesheets and team utilization
- Creation, identification, extension, and tracking of resource requests via visual projections
- Workflow settings for project and resource approval depending on roles.

FSX Web Applications
Feb 2019 — Jul 2019

- **Project Stack:** Angular 7, TypeScript, SCSS, NPM, GIT
- FSX web applications utilize the common UI design ensuring a consistent user experience across applications
- The project has a collection of components that would satisfy most of the UI requirements of the web application like a data table, dropdown, multi-list select, treeview, image, popup, calendar, and other input components. These components have a good amount of events and properties exposed to allow customization.

Re-Insurance Fund Allocations System
Dec 2018 — Feb 2019

- **Project Stack:** Angular 6, TypeScript, PrimeNG, Bootstrap, CSS3, NPM, SVN
- The project involved developing a web-based application to automate the reinsurance fund allocations system and create reports based on the customer requirements for facultative, proportional, and excess-of-loss (XOL).

Vendor Oversight Management
Jul 2016 — Nov 2018

- **Project Stack:** AngularJS, CSS3, NPM, GIT, Bootstrap, KendoUI
- The client is a premier marketplace and transaction solutions provider for the real estate, mortgage, and consumer debt industries.
- The project involved developing Vendor Management Platform to track all vendors in one place and receive timely alerts and insights into vendor conformity.
